Career Objective

Java Full-Stack Developer with experience in building responsive user interfaces using React.js and developing backend services using Java and Spring Boot. Seeking an opportunity to design and implement end-to-end web applications with RESTful APIs, clean architecture, and efficient database integration, with a focus on performance optimization.

Education

SRM Institute Of Science And Technology

Sep 2020 – May 2024

Bachelor of Technology (Civil Engineering) , CGPA 8.45.

Swami Vivekananda Matriculation Higher Secondary School

Jun 2019 – April 2020

HSLC, Percentage 71%

Swami Vivekananda Matriculation Higher Secondary School

Jun 2017 – April 2018

SSLC, Percentage 95%.

Skills

- ✓ **Frontend:** React.js, Redux Toolkit, Redux-Saga, React Native (Expo), HTML5, CSS3, JavaScript ES6+, SCSS
- ✓ **State Management:** Redux, Redux-Saga, Context Api, API Integration, Async Programming
- ✓ **Authentication:** JWT Authentication, Axios Interceptors, Protected Routes, Access & Refresh Token Flow,
- ✓ **Tools and Work Flow :** GitHub, GitLab, Postman, VSCode, Figma
- ✓ **Backend:** Core Java , Advanced Java, Spring Boot, REST APIs, Data Structures(Basic), JDBC, MySQL.
- Soft skills :** Communication, Problem Solving, Analytical Thinking, Collaborative, Critical Thinking.

Experience

Annular Technologies

Mar 2025 – Jul 2025

ReactJs Developer Intern

- ✓ Implemented end-to-end authentication flows in React and React Native by integrating JWT login, Axios Interceptors, refresh token cycles, cookie-based sessions, AsyncStorage, protected routes, and centralized state management using Redux Toolkit and Redux-Saga to ensure secure, stable, and seamless user sessions.
- ✓ Developed scalable API integrations using Redux-Saga by structuring action types, root index files, sagas, reducers, and store configuration to manage asynchronous workflows and predictable state updates.
- ✓ Gained hands-on experience with Next.js, including setting up routing, organizing folder structure, and implementing basic page navigation for optimized project architecture.

Projects

Title : Leegifts-Clone Website

Sept 2024 – Nov 2024

Link : <https://sujithsgit.github.io/leegifts-ecommerce>

Technology and Tools used : Html, Css, Bootstrap, Javascript, React.js, Redux Toolkit, Postman.

Built a full-stack e-commerce web app using React.js, integrated Retool API for backend, and implemented JWT authentication for security. Managed state efficiently with Redux Toolkit, ensured data persistence by storing cart data in local storage, and integrated DummyJSON API for authentication. Designed a responsive UI, tested APIs and upload customized values using Postman.

Habit Tracker Application using Spring Boot and ReactJs.

Nov 2025 – Jan 2026

Developed a full-stack Daily Resolution & Habit Tracker application using Java (Spring Boot) and React.js to help users create, manage, and track daily habits and resolutions. Designed and implemented RESTful APIs for CRUD operations and integrated the frontend with backend services using Axios. Followed layered architecture with proper validation, exception handling, and database persistence using MySQL to ensure scalable and maintainable backend development.

Certifications and Achievements

Full Stack Development (Java & Reactjs) - Besant Technologies
